

**AMENDMENTS TO THE CLAIMS:**

This listing of claims will replace all prior versions and listings of claims in the application:

1. (Currently Amended) A computer-implemented method for managing purchasing data, the method comprising:

receiving purchasing data from a purchasing entity, wherein the purchasing data relates to purchase transactions for a plurality of products purchased by the purchasing entity, wherein the received purchasing data does not include data identifying each product corresponding to each transaction;

using a computer to identify identifying, for each transaction, a product related to the transaction by comparing the received purchasing data with product information stored in a product index, wherein the product information in the index associates at least a portion of the received purchasing data with a particular product;

modifying the received purchasing data to include data representing the identified product; and

processing the modified purchasing data to reflect all purchase transactions concerning the identified product.
